

## **RAIL FILES & HANDLES**

### **DESCRIPTION**

**Part No. 10-750**

This 14" (356 mm) **Rail File** is made from the finest hardened steel available and has 8 teeth per 1" (25.4 mm). When used with handle **#10-760**, it is ideal for dressing elevator guide rail joints and escalator step wheel tracks for quieter, smoother rides.

#### **Wooden Handle**

This file handle (**#10-760**) is made of smoothly shaped wood that will fit comfortably in your hand. For use with 14" steel files **#10-751** or **#10-751**.

#### **Metal Handle**

This flexible metal handle (**#10-761**) can be easily adjusted for curving the file either outward or inward. Use with 12" (305mm) or 14" (356mm) files.

**Part No. 10-760**

Part No.	Description
