

Beamer 2000

Description

The Beamer 2000 fits 3.5"-14" beams up to 1 1/4" thickness on top or bottom flange. It is weather resistant, reusable and extremely durable. It slides easily in both direction and there are no tools needed for fast installation. When used at foot level, a heavy-duty shock absorbing lanyard must be used.

Key Features:

- The Beamer 2000 fits 3.5" to 14" in beams to provide fall arrest while attached to an H or I Beam
- This anchor is weather resistant which means it resists rust and wear from the elements
- The Beamer 2000 anchor is reusable and lightweight and can easily be taken from jobsite to jobsite
- The ratcheting end piece of the anchor makes it easy to lock into position
- The Beamer 2000 slides easily across the flange in both directions so the anchor will never hold you up, and it won't scratch the flange
- Absolutely no tools are required to lock a Beamer 2000 into place, making it efficient and user friendly
- Meets all applicable OSHA Requirements
